Portfolio service: system architecture

The portfolio is static. Résumé authorization is decided in Node functions against signed cookies or Stripe payment records.

IMPLEMENTED BOUNDARY

No database participates in the current UI flow. Cookie state stays in the browser; paid proof stays at Stripe. The PDF path is not a storage service.

SCOPE + DEPLOYMENT

Legacy request / verify / resend-code / notify routes still reference Redis + Resend, but current UI does not call them. Sandbox intent; actual credentials and hosting unverified.

SOURCE e91ebdd • Code-based architecture; deployment and credentials not validated.

EVIDENCE src/components/ResumeAccess.jsx · api/resume/* · api/stripe/webhook.js · server/_lib/* · vercel.json

Three entry points, two authorization paths

Contact and free requests share the same draft-email behavior. Opening or sending the email is not an access prerequisite.

PAID RÉSUMÉ

CHOOSE IN RÉSUMÉ DIALOG

Buy me a coffee

POST /api/resume/checkout {} • USD $5
Server fixes price; validates PDF
Browser flow cookies + hosted URL

redirect to hosted URL

LEAVE PORTFOLIO

Stripe hosted checkout

Card payment in Stripe UI
Success returns a session ID

CANCEL / CREATE ERROR

Cancel → choose again
Create failure → retry
No payment → no PDF

success + session_id

RETURN TO PORTFOLIO

Open my résumé

GET /api/resume/download
Cookie + Stripe + 30-day checks

DOWNLOAD REJECTED

401: use paying browser
403: unpaid / invalid / expired
Provider / PDF issue: retry
Receipt → owner for help

valid

AUTHORIZED RESULT

PDF opens in browser

REDIRECT ≠ ACCESS

Redirect alone grants nothing

FREE RÉSUMÉ + CONTACT

RÉSUMÉ DIALOG

Request it for free

Name, email, subject, message

CONTACT BUTTON

Email Me

Same fields and submit handler

FORM SUBMIT

Open draft and prepare access in parallel

CLIENT-SIDE HANDOFF

mailto: draft opens

User reviews and sends manually
No delivery or email verification

ACCESS PREPARATION

POST email-access {}

Signed cookie: ready in 10 seconds
Expires 30 days after preparation

wait 10 s

AFTER COUNTDOWN

GET email-access

Server verifies signature + timing
Early / missing / expired → deny

FAILURE + RETRY

Preparation error → UI Retry access
GET 401 / 403 → return or wait
PDF unavailable → server error

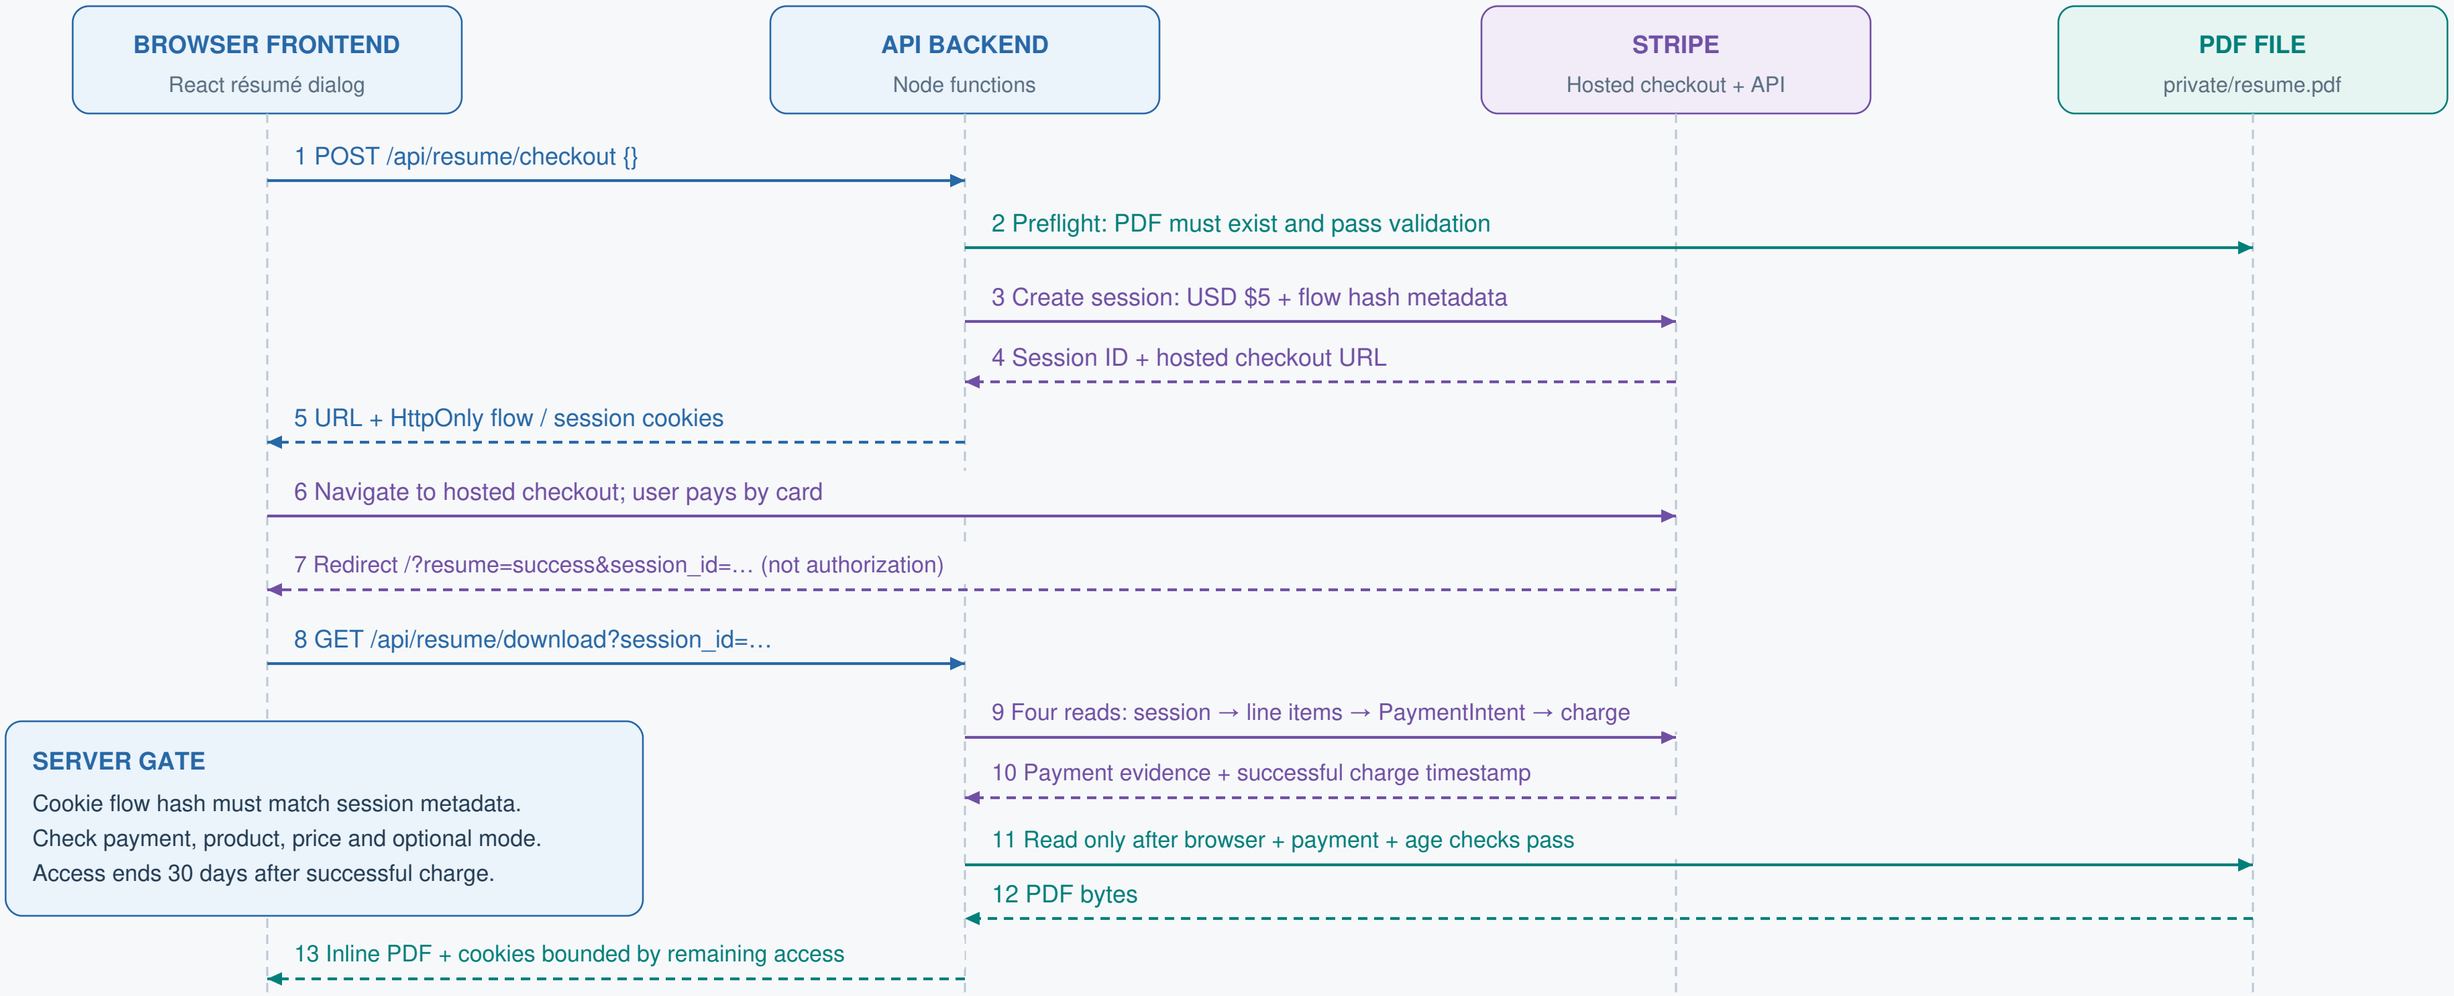

AUTHORIZED RESULT

PDF opens; email send remains independent
